Welcome to the 7th edition of HEAL: the National Conference on Healthcare Excellence through Administration and Leadership.

Due to the prevailing circumstances, this year we are constrained to organise the conference on a virtual medium in the form of a two hour webinar. The conference will bring together national and international senior level experts from the healthcare industry to share their knowledge, expertise and thoughts on successful healthcare strategies, focusing on this year's theme 'Future Healthcare: Harnessing Technology'. The conference promises comprehensive professional solutions that will help organisations increase their productivity and also improve the quality of products and services. As an accompaniment there will be online quiz and poll.
